## Conflict Minerals Statement for Ti-Pure™ Titanium Dioxide Pigments

On July 20, 2010, HR 4173, the Dodd-Frank Wall Street Reform and Consumer Protection Act, was signed into law. According to Section 1502, US-registered companies selling products using any of the conflict minerals (or metal derivatives) originating in the Democratic Republic of the Congo (DRC) or neighboring countries (contiguous nation states of South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia, Angola, Congo, and the Central African Republic) would have to disclose to the Securities and Exchange Commission (SEC) the country of origin of those minerals. The term “conflict mineral” is defined in Section 1502(e) (4) of the Act as (A) columbite-tantalite, also known as

coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the DRC countries.

No “conflict minerals”, as defined by Section 1502 of the Dodd-Frank Act, or any other ores/minerals sourced from DRC countries, are used to produce Ti-Pure™ titanium dioxide pigments.
